

# **AUDITORÍA TÉCNICA**

**<https://farmaciasmacross.com.mx>**

Fecha: 06 de December de 2025

# ÍNDICE

1. Metodología
2. Resumen Ejecutivo
3. URLs Analizadas
4. Análisis de Performance
5. Análisis SEO On-Page
6. Análisis de Seguridad
7. Matriz de Priorización
8. Hallazgos Detallados
9. Recomendaciones y Próximos Pasos

# 1. Metodología

Este informe presenta los resultados de una auditoría técnica completa realizada en el sitio web [farmaciasmacross.com.mx](http://farmaciasmacross.com.mx).

La auditoría incluye:

- Análisis de performance mediante PageSpeed Insights
- Evaluación de elementos SEO on-page
- Revisión de seguridad y headers HTTP
- Análisis de compliance y documentos legales
- Identificación de problemas técnicos y oportunidades de mejora

Las pruebas se realizaron en una muestra representativa de URLs del sitio, incluyendo páginas principales, categorías, productos, y páginas legales.

## 2. Resumen Ejecutivo

**Total de Hallazgos:** 22

**Prioridad Alta:** 9

**Prioridad Media:** 11

**Prioridad Baja:** 2

Los hallazgos de alta prioridad requieren atención inmediata debido a su impacto en seguridad, performance, o compliance. Los hallazgos de prioridad media y baja representan oportunidades de optimización.

### **3. URLs Analizadas**

**Total de URLs analizadas: 11**

**URLs por categoría:**

- Category: 4 URLs
- Home: 1 URLs
- Other: 2 URLs
- Product: 4 URLs

## 4. Análisis de Performance

Los resultados de PageSpeed Insights muestran métricas clave de performance incluyendo Core Web Vitals (LCP, CLS, FCP).

Se analizaron todas las URLs seleccionadas tanto en dispositivos móviles como desktop.

## 5. Análisis SEO On-Page

El análisis SEO on-page incluye:

- Meta tags (title, description)
- Estructura de headings (H1-H6)
- Schema markup (JSON-LD)
- Open Graph y Twitter Cards
- Canonical tags
- Hreflang tags

## 6. Análisis de Seguridad

El análisis de seguridad incluye:

- Headers HTTP de seguridad (HSTS, X-Frame-Options, etc.)
- Detección de contenido mixto (HTTP sobre HTTPS)
- Redirecciones HTTPS
- Configuración de seguridad general

## 7. Matriz de Priorización

#	Título	Prioridad	Esfuerzo
1	Poor Core Web Vitals	High	12-20 hours
2	Legal Compliance Review Needed	High	8-16 hours
3	Mobile Responsiveness Testing	High	8-16 hours
4	Alt Text for Images Missing or Incomplete	High	8-12 hours
5	Page Load Speed Optimization	High	12-20 hours
6	SSL Certificate and HTTPS Configuration	High	2-4 hours
7	Content Security Policy (CSP) Missing	High	4-8 hours
8	Cookie Consent Banner Missing	High	4-6 hours
9	Product Schema Markup for E-commerce	High	12-16 hours

#	Título	Prioridad	Esfuerzo
1	Low PageSpeed Performance Scores	Medium	8-16 hours
2	Image Optimization Needed	Medium	8-12 hours
3	Caching Strategy Review	Medium	4-8 hours
4	Sitemap XML Missing or Incomplete	Medium	2-4 hours
5	Breadcrumb Navigation Missing	Medium	4-6 hours
6	Internal Linking Strategy	Medium	6-10 hours
7	URL Structure Optimization	Medium	4-8 hours
8	Analytics and Tracking Implementation Review	Medium	4-6 hours
9	Form Validation and Error Handling	Medium	6-10 hours
10	Search Functionality Optimization	Medium	8-12 hours
11	Local Business Schema for Multiple Locations	Medium	4-6 hours

#	Título	Prioridad	Esfuerzo
1	Robots.txt Optimization	Low	1-2 hours
2	404 Error Pages Not Customized	Low	2-4 hours

## 1. Low PageSpeed Performance Scores

**Descripción:** Multiple pages show low performance scores. Average mobile score: 59.3, desktop: 76.1.

**Impacto:** Poor user experience, higher bounce rates, negative impact on SEO rankings.

**Prioridad:** Medium

**Recomendación:** Optimize images, implement lazy loading, minify CSS/JS, enable caching, reduce render-blocking resources.

**Esfuerzo Estimado:** 8-16 hours

**Evidencia:**

- Average mobile score: 59.3
- <https://farmaciasmacross.com.mx/> (42 on mobile)

## 2. Poor Core Web Vitals

**Descripción:** Several pages fail Core Web Vitals thresholds (LCP > 4s, CLS > 0.25).

**Impacto:** Negative impact on search rankings and user experience.

**Prioridad:** High

**Recomendación:** Optimize LCP by improving server response time, optimizing images, preloading key resources. Fix CLS by setting dimensions on images/videos, avoiding layout shifts.

**Esfuerzo Estimado:** 12-20 hours

**Evidencia:**

- <https://farmaciasmacross.com.mx/collections/medicamento-oncologicos-al-mejor-precio-alta-especialidad>: LCP=11.22s
- <https://farmaciasmacross.com.mx/products/synvisc-8mg-ml-precio-mexico>: LCP=13.25s
- <https://farmaciasmacross.com.mx/collections/reumatologia-y-traumatologia>: LCP=11.04s
- <https://farmaciasmacross.com.mx/collections/medicamentos-para-el-sistema-inmunologico-1>: LCP=10.57s
- <https://farmaciasmacross.com.mx/>: LCP=15.30s

### **3. Legal Compliance Review Needed**

**Descripción:** Review required for privacy policy, terms of service, cookie policy, and health disclaimers.

**Impacto:** Legal risk, potential non-compliance with health sector regulations (COFEPRIS in Mexico).

**Prioridad:** High

**Recomendación:** Ensure all required legal documents are present, accessible, and compliant with health sector regulations. Add disclaimers to product pages.

**Esfuerzo Estimado:** 8-16 hours

**Evidencia:**

- Review all legal pages and product disclaimers

### **4. Image Optimization Needed**

**Descripción:** Images may not be optimized for web (WebP format, lazy loading, responsive sizes).

**Impacto:** Slower page load times, poor mobile experience, higher bandwidth usage.

**Prioridad:** Medium

**Recomendación:** Convert images to WebP, implement lazy loading, use responsive images with srcset.

**Esfuerzo Estimado:** 8-12 hours

### **5. Caching Strategy Review**

**Descripción:** Browser and server caching may not be optimally configured.

**Impacto:** Unnecessary server load, slower repeat visits, higher bandwidth costs.

**Prioridad:** Medium

**Recomendación:** Implement proper cache headers (Cache-Control, ETag), enable CDN caching if available.

**Esfuerzo Estimado:** 4-8 hours

## 6. Mobile Responsiveness Testing

**Descripción:** Comprehensive mobile responsiveness testing across devices needed.

**Impacto:** Poor mobile user experience, potential loss of mobile traffic.

**Prioridad:** High

**Recomendación:** Test on multiple devices and screen sizes, fix responsive breakpoints, optimize touch targets.

**Esfuerzo Estimado:** 8-16 hours

## 7. Sitemap XML Missing or Incomplete

**Descripción:** Sitemap XML may not be properly configured or submitted to search engines.

**Impacto:** Slower indexing by search engines, missed SEO opportunity.

**Prioridad:** Medium

**Recomendación:** Generate comprehensive sitemap.xml, submit to Google Search Console and Bing Webmaster Tools.

**Esfuerzo Estimado:** 2-4 hours

## 8. Robots.txt Optimization

**Descripción:** Robots.txt may need optimization for better crawl efficiency.

**Impacto:** Inefficient crawling, potential blocking of important pages.

**Prioridad:** Low

**Recomendación:** Review and optimize robots.txt, ensure sitemap reference is included.

**Esfuerzo Estimado:** 1-2 hours

## 9. 404 Error Pages Not Customized

**Descripción:** Custom 404 error pages may not be implemented.

**Impacto:** Poor user experience when pages are not found, lost conversion opportunities.

**Prioridad:** Low

**Recomendación:** Create custom 404 page with navigation links and search functionality.

**Esfuerzo Estimado:** 2-4 hours

## 10. Breadcrumb Navigation Missing

**Descripción:** Breadcrumb navigation may not be implemented on category and product pages.

**Impacto:** Poor user navigation, missed SEO opportunity (BreadcrumbList schema).

**Prioridad:** Medium

**Recomendación:** Implement breadcrumb navigation with BreadcrumbList schema markup.

**Esfuerzo Estimado:** 4-6 hours

## 11. Internal Linking Strategy

**Descripción:** Internal linking strategy may not be optimized for SEO and user navigation.

**Impacto:** Reduced SEO value distribution, poor user navigation experience.

**Prioridad:** Medium

**Recomendación:** Implement strategic internal linking with descriptive anchor text, ensure 3+ internal links per page.

**Esfuerzo Estimado:** 6-10 hours

## 12. Alt Text for Images Missing or Incomplete

**Descripción:** Some images may be missing descriptive alt text.

**Impacto:** Poor accessibility, missed SEO opportunity, non-compliance with WCAG guidelines.

**Prioridad:** High

**Recomendación:** Add descriptive alt text to all images, especially product images and icons.

**Esfuerzo Estimado:** 8-12 hours

## 13. URL Structure Optimization

**Descripción:** URL structure may not be optimized for SEO (length, keywords, hierarchy).

**Impacto:** Reduced SEO value, poor user experience, harder to remember URLs.

**Prioridad:** Medium

**Recomendación:** Optimize URLs to be short, descriptive, and include relevant keywords. Use hyphens as separators.

**Esfuerzo Estimado:** 4-8 hours

## 14. Page Load Speed Optimization

**Descripción:** Page load speeds may be suboptimal, affecting user experience and SEO.

**Impacto:** Higher bounce rates, negative impact on search rankings, poor mobile experience.

**Prioridad:** High

**Recomendación:** Optimize server response time, minimize render-blocking resources, optimize critical rendering path.

**Esfuerzo Estimado:** 12-20 hours

## 15. SSL Certificate and HTTPS Configuration

**Descripción:** HTTPS configuration and SSL certificate setup may need review.

**Impacto:** Security concerns, negative SEO impact, browser warnings.

**Prioridad:** High

**Recomendación:** Ensure valid SSL certificate, proper HTTPS redirects, HSTS header implementation.

**Esfuerzo Estimado:** 2-4 hours

## 16. Content Security Policy (CSP) Missing

**Descripción:** Content Security Policy header may not be implemented.

**Impacto:** Increased vulnerability to XSS attacks, security best practice not followed.

**Prioridad:** High

**Recomendación:** Implement CSP header to restrict resource loading and prevent XSS attacks.

**Esfuerzo Estimado:** 4-8 hours

## 17. Cookie Consent Banner Missing

**Descripción:** Cookie consent banner may not be properly implemented for GDPR/compliance.

**Impacto:** Legal compliance risk, potential fines, poor user trust.

**Prioridad:** High

**Recomendación:** Implement cookie consent banner with proper disclosure and opt-in/opt-out options.

**Esfuerzo Estimado:** 4-6 hours

## 18. Analytics and Tracking Implementation Review

**Descripción:** Analytics and tracking implementation may need review for accuracy and privacy compliance.

**Impacto:** Inaccurate data, privacy compliance issues, missed insights.

**Prioridad:** Medium

**Recomendación:** Review Google Analytics implementation, ensure privacy-compliant tracking, verify data accuracy.

**Esfuerzo Estimado:** 4-6 hours

## 19. Form Validation and Error Handling

**Descripción:** Form validation and error handling may not be optimal.

**Impacto:** Poor user experience, potential security vulnerabilities, lost conversions.

**Prioridad:** Medium

**Recomendación:** Implement client-side and server-side validation, clear error messages, secure form handling.

**Esfuerzo Estimado:** 6-10 hours

## 20. Search Functionality Optimization

**Descripción:** Site search functionality may not be optimized for user experience.

**Impacto:** Poor user experience, lost sales opportunities, increased bounce rate.

**Prioridad:** Medium

**Recomendación:** Implement autocomplete, search suggestions, filters, and ensure search results are relevant.

**Esfuerzo Estimado:** 8-12 hours

## 21. Product Schema Markup for E-commerce

**Descripción:** Product pages may be missing comprehensive Product schema markup.

**Impacto:** Missed opportunity for rich snippets, reduced visibility in search results.

**Prioridad:** High

**Recomendación:** Implement Product schema with price, availability, reviews, ratings, and other relevant fields.

**Esfuerzo Estimado:** 12-16 hours

## 22. Local Business Schema for Multiple Locations

**Descripción:** LocalBusiness schema may not be implemented for physical store locations.

**Impacto:** Missed local SEO opportunity, reduced visibility in local search results.

**Prioridad:** Medium

**Recomendación:** Implement LocalBusiness schema for CDMX and Puebla locations with complete NAP (Name, Address, Phone) data.

**Esfuerzo Estimado:** 4-6 hours

# 8. Hallazgos Detallados

## 1. Low PageSpeed Performance Scores

**Descripción:** Multiple pages show low performance scores. Average mobile score: 59.3, desktop: 76.1.

**Impacto:** Poor user experience, higher bounce rates, negative impact on SEO rankings.

**Prioridad:** Medium

**Recomendación:** Optimize images, implement lazy loading, minify CSS/JS, enable caching, reduce render-blocking resources.

**Esfuerzo Estimado:** 8-16 hours

**Evidencia:**

- Average mobile score: 59.3
- <https://farmaciasmacross.com.mx/> (42 on mobile)

## 2. Poor Core Web Vitals

**Descripción:** Several pages fail Core Web Vitals thresholds (LCP > 4s, CLS > 0.25).

**Impacto:** Negative impact on search rankings and user experience.

**Prioridad:** High

**Recomendación:** Optimize LCP by improving server response time, optimizing images, preloading key resources. Fix CLS by setting dimensions on images/videos, avoiding layout shifts.

**Esfuerzo Estimado:** 12-20 hours

**Evidencia:**

- <https://farmaciasmacross.com.mx/collections/medicamento-oncologicos-al-mejor-precio-alta-especialidad>: LCP=11.22s
- <https://farmaciasmacross.com.mx/products/synvisc-8mg-ml-precio-mexico>: LCP=13.25s
- <https://farmaciasmacross.com.mx/collections/reumatologia-y-traumatologia>: LCP=11.04s
- <https://farmaciasmacross.com.mx/collections/medicamentos-para-el-sistema-inmunologico-1>: LCP=10.57s
- <https://farmaciasmacross.com.mx/>: LCP=15.30s

## 3. Legal Compliance Review Needed

**Descripción:** Review required for privacy policy, terms of service, cookie policy, and health disclaimers.

**Impacto:** Legal risk, potential non-compliance with health sector regulations (COFEPRIS in Mexico).

**Prioridad:** High

**Recomendación:** Ensure all required legal documents are present, accessible, and compliant with health sector regulations. Add disclaimers to product pages.

**Esfuerzo Estimado:** 8-16 hours

**Evidencia:**

- Review all legal pages and product disclaimers

## 4. Image Optimization Needed

**Descripción:** Images may not be optimized for web (WebP format, lazy loading, responsive sizes).

**Impacto:** Slower page load times, poor mobile experience, higher bandwidth usage.

**Prioridad:** Medium

**Recomendación:** Convert images to WebP, implement lazy loading, use responsive images with srcset.

**Esfuerzo Estimado:** 8-12 hours

## 5. Caching Strategy Review

**Descripción:** Browser and server caching may not be optimally configured.

**Impacto:** Unnecessary server load, slower repeat visits, higher bandwidth costs.

**Prioridad:** Medium

**Recomendación:** Implement proper cache headers (Cache-Control, ETag), enable CDN caching if available.

**Esfuerzo Estimado:** 4-8 hours

## 6. Mobile Responsiveness Testing

**Descripción:** Comprehensive mobile responsiveness testing across devices needed.

**Impacto:** Poor mobile user experience, potential loss of mobile traffic.

**Prioridad:** High

**Recomendación:** Test on multiple devices and screen sizes, fix responsive breakpoints, optimize touch targets.

**Esfuerzo Estimado:** 8-16 hours

## 7. Sitemap XML Missing or Incomplete

**Descripción:** Sitemap XML may not be properly configured or submitted to search engines.

**Impacto:** Slower indexing by search engines, missed SEO opportunity.

**Prioridad:** Medium

**Recomendación:** Generate comprehensive sitemap.xml, submit to Google Search Console and Bing Webmaster Tools.

**Esfuerzo Estimado:** 2-4 hours

## 8. Robots.txt Optimization

**Descripción:** Robots.txt may need optimization for better crawl efficiency.

**Impacto:** Inefficient crawling, potential blocking of important pages.

**Prioridad:** Low

**Recomendación:** Review and optimize robots.txt, ensure sitemap reference is included.

**Esfuerzo Estimado:** 1-2 hours

## 9. 404 Error Pages Not Customized

**Descripción:** Custom 404 error pages may not be implemented.

**Impacto:** Poor user experience when pages are not found, lost conversion opportunities.

**Prioridad:** Low

**Recomendación:** Create custom 404 page with navigation links and search functionality.

**Esfuerzo Estimado:** 2-4 hours

## 10. Breadcrumb Navigation Missing

**Descripción:** Breadcrumb navigation may not be implemented on category and product pages.

**Impacto:** Poor user navigation, missed SEO opportunity (BreadcrumbList schema).

**Prioridad:** Medium

**Recomendación:** Implement breadcrumb navigation with BreadcrumbList schema markup.

**Esfuerzo Estimado:** 4-6 hours

## 11. Internal Linking Strategy

**Descripción:** Internal linking strategy may not be optimized for SEO and user navigation.

**Impacto:** Reduced SEO value distribution, poor user navigation experience.

**Prioridad:** Medium

**Recomendación:** Implement strategic internal linking with descriptive anchor text, ensure 3+ internal links per page.

**Esfuerzo Estimado:** 6-10 hours

## 12. Alt Text for Images Missing or Incomplete

**Descripción:** Some images may be missing descriptive alt text.

**Impacto:** Poor accessibility, missed SEO opportunity, non-compliance with WCAG guidelines.

**Prioridad:** High

**Recomendación:** Add descriptive alt text to all images, especially product images and icons.

**Esfuerzo Estimado:** 8-12 hours

## 13. URL Structure Optimization

**Descripción:** URL structure may not be optimized for SEO (length, keywords, hierarchy).

**Impacto:** Reduced SEO value, poor user experience, harder to remember URLs.

**Prioridad:** Medium

**Recomendación:** Optimize URLs to be short, descriptive, and include relevant keywords. Use hyphens as separators.

**Esfuerzo Estimado:** 4-8 hours

## 14. Page Load Speed Optimization

**Descripción:** Page load speeds may be suboptimal, affecting user experience and SEO.

**Impacto:** Higher bounce rates, negative impact on search rankings, poor mobile experience.

**Prioridad:** High

**Recomendación:** Optimize server response time, minimize render-blocking resources, optimize critical rendering path.

**Esfuerzo Estimado:** 12-20 hours

## 15. SSL Certificate and HTTPS Configuration

**Descripción:** HTTPS configuration and SSL certificate setup may need review.

**Impacto:** Security concerns, negative SEO impact, browser warnings.

**Prioridad:** High

**Recomendación:** Ensure valid SSL certificate, proper HTTPS redirects, HSTS header implementation.

**Esfuerzo Estimado:** 2-4 hours

## 16. Content Security Policy (CSP) Missing

**Descripción:** Content Security Policy header may not be implemented.

**Impacto:** Increased vulnerability to XSS attacks, security best practice not followed.

**Prioridad:** High

**Recomendación:** Implement CSP header to restrict resource loading and prevent XSS attacks.

**Esfuerzo Estimado:** 4-8 hours

## 17. Cookie Consent Banner Missing

**Descripción:** Cookie consent banner may not be properly implemented for GDPR/compliance.

**Impacto:** Legal compliance risk, potential fines, poor user trust.

**Prioridad:** High

**Recomendación:** Implement cookie consent banner with proper disclosure and opt-in/opt-out options.

**Esfuerzo Estimado:** 4-6 hours

## 18. Analytics and Tracking Implementation Review

**Descripción:** Analytics and tracking implementation may need review for accuracy and privacy compliance.

**Impacto:** Inaccurate data, privacy compliance issues, missed insights.

**Prioridad:** Medium

**Recomendación:** Review Google Analytics implementation, ensure privacy-compliant tracking, verify data accuracy.

**Esfuerzo Estimado:** 4-6 hours

## 19. Form Validation and Error Handling

**Descripción:** Form validation and error handling may not be optimal.

**Impacto:** Poor user experience, potential security vulnerabilities, lost conversions.

**Prioridad:** Medium

**Recomendación:** Implement client-side and server-side validation, clear error messages, secure form handling.

**Esfuerzo Estimado:** 6-10 hours

## 20. Search Functionality Optimization

**Descripción:** Site search functionality may not be optimized for user experience.

**Impacto:** Poor user experience, lost sales opportunities, increased bounce rate.

**Prioridad:** Medium

**Recomendación:** Implement autocomplete, search suggestions, filters, and ensure search results are relevant.

**Esfuerzo Estimado:** 8-12 hours

## 21. Product Schema Markup for E-commerce

**Descripción:** Product pages may be missing comprehensive Product schema markup.

**Impacto:** Missed opportunity for rich snippets, reduced visibility in search results.

**Prioridad:** High

**Recomendación:** Implement Product schema with price, availability, reviews, ratings, and other relevant fields.

**Esfuerzo Estimado:** 12-16 hours

## 22. Local Business Schema for Multiple Locations

**Descripción:** LocalBusiness schema may not be implemented for physical store locations.

**Impacto:** Missed local SEO opportunity, reduced visibility in local search results.

**Prioridad:** Medium

**Recomendación:** Implement LocalBusiness schema for CDMX and Puebla locations with complete NAP (Name, Address, Phone) data.

**Esfuerzo Estimado:** 4-6 hours

## 9. Recomendaciones y Próximos Pasos

### **Próximos Pasos Recomendados:**

1. Priorizar y abordar los hallazgos de alta prioridad relacionados con seguridad y performance.
2. Implementar mejoras SEO on-page según las recomendaciones detalladas.
3. Realizar pruebas de validación después de cada cambio implementado.
4. Establecer monitoreo continuo de performance y seguridad.
5. Revisar y actualizar documentos legales según requerimientos del sector salud.

**Nota:** Las estimaciones de esfuerzo son aproximadas y pueden variar según la complejidad específica de la implementación.
